What each module does

Hotel services page — your own guest services page. Sell upgrades, spa, tours and transfers from a single link.

Guest communication — WhatsApp, Instagram, Messenger, email and web chat in one inbox, with a guest profile behind every thread.

Campaigns — welcome, pre-arrival, in-stay and after-checkout messages driven by the reservation, plus offers to past guests.

Team chat — shifts, handovers and departments in a chat the property owns, so the history stays when a person leaves.

Tasks & checklists — work assigned to a person and attached to a room, tracked from New to Completed.

Recurring tasks — work that repeats raises itself on schedule with its checklist attached, so a plant round or a safety check is never missed.

Housekeeping — room status and cleaning rounds, so the front desk can see what is ready without walking the floor.

PMS integration — layers on the booking system you already run. Keep your PMS, channel manager and booking engine.

Cross-property layer — one inbox and one task list across every hotel, with each reply scoped to the right property.

Payment

Special request

Bank transfer or your own terms, prepared by hand.

No fee

Card or automatic invoice

The plan price is the whole price.

If you pay per room today

Most hotel software is sold per room, per month, per application. Take the cautious case — a guest communication app at **\$4 a room** and an operations app at **\$4 a room**, the bottom of the usual range with every extra fee ignored. That is **\$8 a room, every month**.

YOUR HOTEL	TWO APPS, PER MONTH	TREEMA SINGLE-PROPERTY	YOU SAVE A YEAR
50 rooms	\$400	\$149	\$3,012
120 rooms	\$960	\$149	\$9,732
300 rooms	\$2,400	\$149	\$27,012
